

WATERLESS CONCRETE CLEANER

CLEANING INSTRUCTIONS

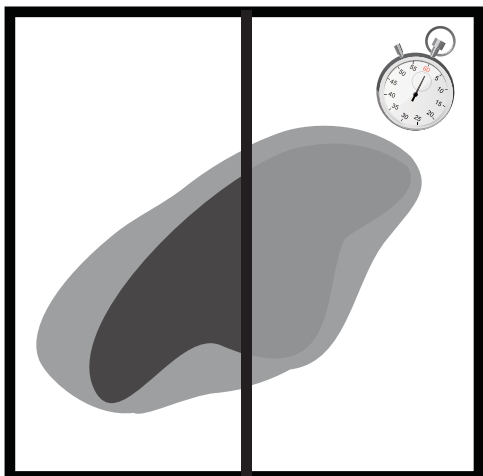

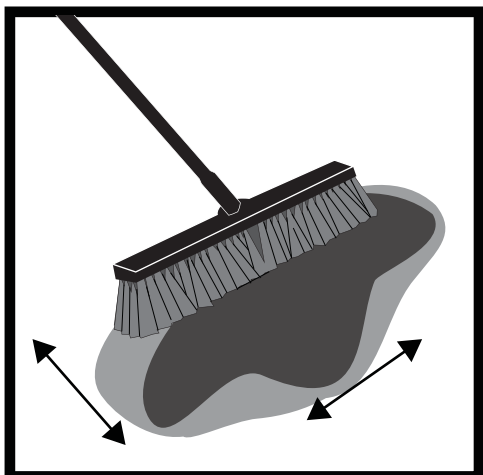

Uses:

To remove hydrocarbon based stains like oil, gas, diesel and more from concrete.

Frequency: Every 1-2 Weeks

To Clean:

1. Ensure area is dry and free of trash or debris
2. Using provided scoop, apply EXIMO directly to oil spot (1/4 cup = 1 fueling point = 1 parking stall)
3. Keeping broom in contact with surface, sweep product forward and backward across the oil spot
4. Next, sweep across the initial line until product is fully dispersed
5. Applying the correct amount of product should leave no excess - if excess remains, continue sweeping until product is fully dispersed
